

**Cornhusker Public Power District in Columbus, NE, has an opening for a
DISTRIBUTION/TRANSMISSION STAKING TECHNICIAN (T-7) \$36.15 - \$49.41**

DISTRIBUTION/TRANSMISSION STAKING

To secure, record, analyze, and maintain engineering data, perform drafting functions, and line staking as assigned.

- Performs drafting functions necessary to maintain engineering working files resulting in current data, maps, etc. to reflect existing system status.
- Investigates, designs, and stakes distribution cable replacement projects and other projects as assigned; and prepares necessary staking sheets and permits to initiate required construction. Easements for new and updated line.
- Inspects and field checks completed work orders to assure compliance with applicable specifications, accurate material charges, and quality workmanship.
- Assist with the analysis of system outages and offer recommendations regarding corrective action to meet reliability standards.
- Receives and analyzes service requests and prepares engineering orders to provide adequate and timely service to consumers.
- Performs necessary tasks associated with customer generation requests and other renewable projects on the distribution system.

High school diploma or equivalent and a two-year associate degree in a related field are required. Graduates of accredited programs such as the Merchant's Powerline Job Training & Safety Program, or equivalent, would also qualify. A minimum of five years of in-the-field electric utility experience may be substituted for some educational requirements.

Mechanical, electrical, design, or surveying background; or previous electric utility experience in operations/engineering is preferred. Previous experience in the areas of computer applications and CAD mapping is helpful.
