

System Engineer

Southwest Public Power District

Southwest Public Power District located in southwest Nebraska, has an opening for the position of System Engineer. The System Engineer is responsible for recommending, planning and overseeing engineering projects, maintaining the District's electric distribution models and assisting the operations department by providing technical support. This position will oversee all aspects of the engineering requirements and implement current and future technologies to ensure a safe, reliable and efficient electric distribution system.

SWPPD's operating hours are compressed work schedule with every other Friday off. A bachelor's degree in electrical engineering or electrical engineering technology is required. In lieu of a degree, a minimum of 5 years of experience in an engineering position at an electric utility may be considered. An effective working knowledge of electrical distribution system operations is required. A valid Nebraska driver's license and passing a pre-employment drug and alcohol test is required.

Southwest Public Power District offers an excellent wage and benefit package, including paid vacation, sick leave, paid health insurance, and funded retirement plans. Southwest Public Power District is an equal opportunity employer and is headquartered in Palisade, Nebraska. The region's schools, small communities, and recreational opportunities make it a great place to live and raise a family. Qualified candidates should submit a letter of interest, resume and references to jobs@swppd.com. Position will be open until filled.
